

Atchison & Topeka Railroad  
Centralized Tie Plant  
Record of Communication  
12/30/86 - 9:00 A.M.

Phone Call:

From: Sandy Anderson (TWC RCRA Enforcement)

To: David Gonzalez (6H-ES)

Sandy Anderson from the TWC RCRA Enforcement returned my phone call regarding the status of the Atchison & Topeka Railroad Centralized Tie Plant in Somerville, Texas. I explained to her that I was interested in updating our CERCLIS printout regarding the status of this site. She told me that this facility had a release to groundwater in an area of complex geology. Currently the RCRA permit for this facility, which calls for corrective action, is in its final draft. Unless a public hearing concerning this permit is held, the permit should be issued in its current form sometime in the near future. The TWC is also issuing an administrative order this month which will fine the company for the mismanagement of wastes which resulted in the release to groundwater. Currently, the company has shown good cooperation in all corrective actions.
